

Product Application

The WST web stiffener track clip prevents web crippling in critical load connections through to the joist or wall stud. Thoroughly engineered, the WST includes a strengthened rib and specific layout of pre-punched guide holes for ultimate reinforcing.

Features and Benefits

- Pre-punched guide holes
- Variety of lengths available
- Prevents web crippling
- One-piece assembly

Material Composition

- Mill certified steel
- ASTM A653/A653M
- 68 mil
 - 57 ksi yield strength
 - 65 ksi tensile strength
 - G90 galvanized coating
